

Digital Transformation Associate: Fuel the future, optimize today

Do you want to be at the forefront of making a real difference in how our company operates? As a Digital Transformation Engineer, you will play a key role in driving our company's digital transformation initiatives. You will be responsible for designing, developing, and implementing new technologies and processes that will help us improve our efficiency, productivity, and customer satisfaction.

What you will do:

- Work with cross-functional teams to identify opportunities for digital transformation
- Lead the integration of digital technologies, like cloud computing, data analytics, and automation, to optimize industrial operations and business processes.
- Develop and maintain technical documentation
- Provide technical support to users
- Stay up-to-date on the latest digital trends and technologies

What you bring:

- A bachelor's degree in computer science, engineering, or a related field
- 3+ years of experience in software development or IT
- Experience with cloud computing, data analytics, and automation
- Strong problem-solving and critical thinking skills
- Excellent communication and interpersonal skills
- A passion for learning and a willingness to adapt to change

Why you should join us:

- Be part of a team that is passionate about making a difference
- Work on cutting-edge technologies
- Have the opportunity to learn and grow
- Make a real impact on our company's success

If you are looking for a challenging and rewarding career, we encourage you to apply!
